EXPERIENCE

UG Labs

May 2022 – Present

Product Operations & Customer Success | Tel Aviv, Israel

First employee at a conversational AI startup building voice-based characters for children in education and gaming. Company grew from 0 to 25 people.

- Owned the full sales cycle on inbound leads: discovery, custom demo, follow-up, close. Built a working demo before every call — a real AI character, voice, and game specific to the prospect — so they'd already tried the product before we got on. Managing 15–20 active deals; closed the first independently
- Designed the conversation logic for the product's first AI characters: scripted dialogue, built JSON conversation trees, defined character responses. In early testing, ran sessions manually as the character to observe how kids respond in real time before the AI existed
- Ran the Kids Lab 2–3x a week for years — 1,200+ sessions with children across Israel and the US. Findings went directly back to the product team
- Designed and ran a public workshop teaching parents and kids to build their own AI characters: concept, site, promotion, facilitation. Now being developed into a company product
- Built the investor research package from 1,000+ sessions — structured, visualized, deployed for fundraising and partner conversations
- Set up HubSpot from scratch; ran the annotation vendor RFQ; managed the Applause engagement (500+ sessions) as the company's sole contact
- Spent 6 months alone in Boise, Idaho running a field operation with no existing contacts. Recruited locally, cold-called daycares, ran Facebook ads, came back with 500 sessions

Israel Defense Forces — Paratroopers, 101st Brigade

6 years, ending 2019

Company Commander | Current reserve rank: Major

- Commanded 160 soldiers through training, from induction to combat readiness. Designed the program, managed the scheduling, owned every outcome. Six years rising through ranks to company commander

EDUCATION

Reichman University (IDC Herzliya)

2019 – 2022

B.Sc. Psychology — GPA: 94/100 | Focus: Human-Computer Interaction & Behavioral Research

- MILAB HCI Research Lab, 2.5 years. Started as a junior researcher, ended up running the study: design, execution, analysis, paper writing
- Founded the Happiness Club. Weekly lectures on well-being, grew to 150+ members, the largest student club at IDC
- **3rd Place, All-Israel National Debate Championship**

LEADERSHIP & ACTIVITIES
